“Trends in Security Competition”

Arthur K. Cebrowski
Director, Force Transformation
15 June 2004

Industrial Age

Trends in Security Competition

Office of Force Transformation

Information Age

- Short Cycle Time
- New Competencies
- Adaptive Planning
- Interdependence

Globalization II (1947 – 199X)

- Developed Rules
- Mature Markets
- Narrowing Customer Base
- Security = Defense

Globalization III (199X – 20XX)

- Emerging Rules
- Market Opportunities
- New Customer Base Emerging
- Security = All Else + Defense

Industrial Age

- Long Cycle Time
- Well Developed Tools / Processes
- Deliberate Planning
- Tortured Interoperability

Transformation

...Meeting the Challenges of the New Competitive Landscape

Security Environment

... *Four Challenges*

Security Environment

... Four Challenges

Office of Force Transformation

VULNERABILITY

Irregular

Those seeking to erode American influence and power by employing unconventional or irregular methods (e.g., terrorism, insurgency, civil war and emerging concepts like "unrestricted warfare")

Likelihood: very high; strategy of the weak
Vulnerability: moderate, if not effectively checked

Higher

Catastrophic

Those seeking to paralyze American leadership & power by employing WMD or WMD-like effects in unwarned attacks on symbolic, critical or other high-value targets (e.g., 9/11, terrorist use of WMD, rogue missile attack)
Likelihood: moderate and increasing
Vulnerability: unacceptable; single event could alter American way of life

Lower

Traditional

Those seeking to challenge American power by instigating traditional military operations with legacy and advanced military capabilities (e.g., conventional air, sea and land forces and nuclear forces of established nuclear powers)
Likelihood: decreasing (absent preemption) due to historic capability-overmatch and expanding qualitative lead
Vulnerability: low, only if transformation is balanced

Lower

LIKELIHOOD

Disruptive

Those seeking to usurp American power and influence by acquiring breakthrough capabilities (e.g., sensors, information, biotechnology, miniaturization on the molecular level, cyber-operations, space, directed-energy and other emerging fields)
Likelihood: Low, but time works against U.S.
Vulnerability: unknown; strategic surprise puts American security at risk

Higher

What Are the Issues?

...Resolving the Contradictions

*Where is the Convergence
Between
“Effects” and Political Victory?*

Oleg Pop

*How Do We Pre-empt
When We Can't Find Targets
Hiding in Plain Sight?*

- Defensive Orientation
- Social Intelligence vs Military Intelligence

*How Do We Avoid
Strategic Surprise?*

Identify Issues of Regret

... Candidates for Action Now

Office of Force Transformation

Warfare elements

- ***Fire*** – non-lethals; directed energy; redirected energy
- ***Maneuver*** – lift for operational maneuver; vertical battlefield; seabasing
- ***Protection*** – urban operations; biomedical countermeasures
- ***C2&C*** – joint interdependency
- ***ISR*** – demand-centered intelligence; tactically responsive space
- ***Logistics*** – joint demand-centered logistics

Risk management (*creating on-ramps*)

- ***Joint concept development & experimentation*** – short cycle time / rapid iteration
- ***Joint training*** – advanced distributed training
- ***Joint S&T*** – strengthen joint / combined warfighting; transform joint force; optimize intel; combat WMD proliferation; fulfill homeland defense duties
- ***People*** (*global trends and implications of exporting security*) – policy choices

Next Generation Weapons

...Do We Have the Right Weapons For the Right War?

Office of Force Transformation

- *Are we making enough investment in physics and energy transfer – the potential for leap vs step technologies?*
- *What is the development direction for critical materials?*
- *Do we have the networked communication and sensors necessary to support the degree of discrimination required in the future conflict environment?*
- *When will we start thinking of targets per weapon vs weapon per target in Land Warfare?*
- *When will we see speed of light weapons on the battlefield?*

Transforming the Metrics

...Shifting value to outcomes

Office of Force Transformation

Initial Metrics

- Networking
- Speed
- Numbers
- Information Generators
- Dispersal

Value of Time
vs.
Cost of Speed

New Basis for Competition

“Dissuasion” = f (present value of future capabilities, future value of present capabilities)

- Create and preserve options
- Employ higher transaction rates
- Achieve higher learning rates
- Create overmatching complexity

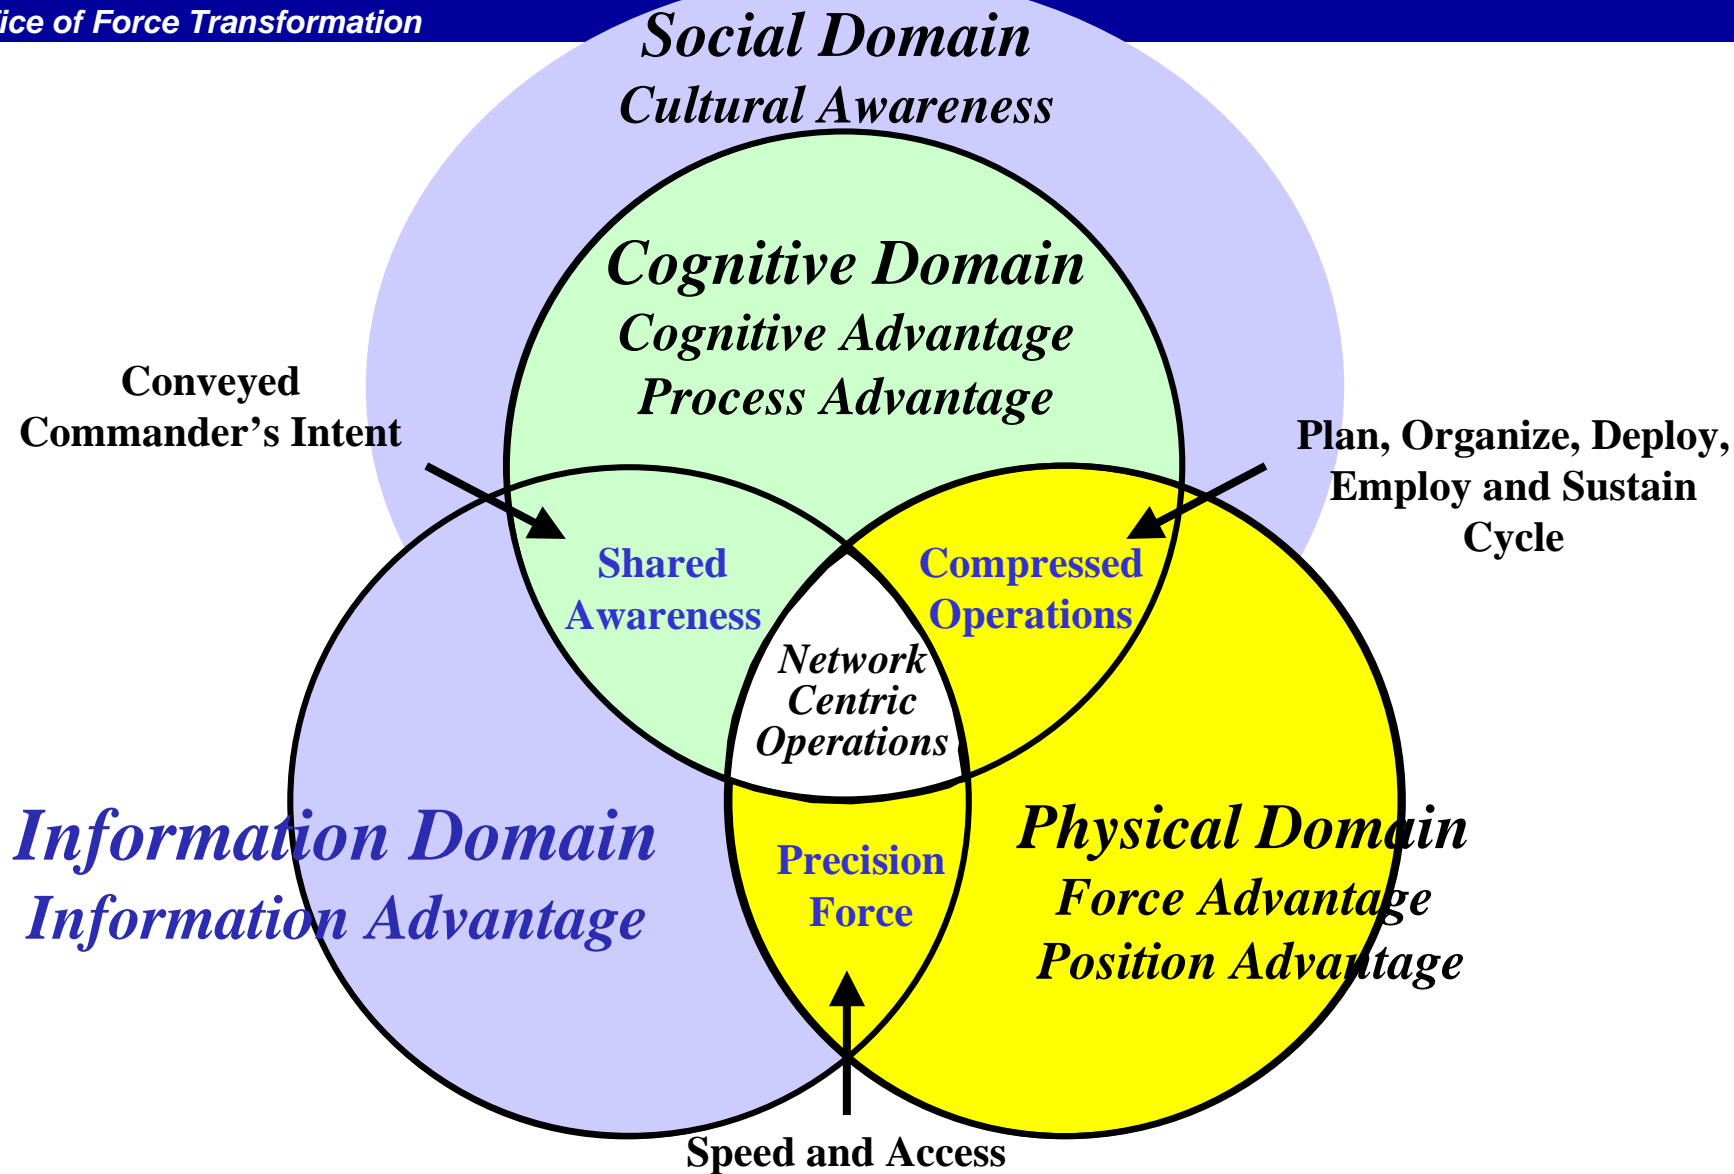

Competing in the Information-Age

...the power of Network-Centric Operations

Office of Force Transformation

Trends in Security Competition

Office of Force Transformation

Back-up Slides

Security Environment ... Four Challenges

Office of Force Transformation

No hard boundaries distinguishing one category from another

Next Generation Weapons

...Do We Have the Right Weapons For the Right War?

Office of Force Transformation

- *Are we making enough investment in physics and energy transfer – the potential for leap vs step technologies?*
- *What is the development direction for critical materials?*
- *Do we have the networked communication and sensors necessary to support degree of discrimination required in future conflict environment?*
- *When will we start thinking of targets per weapon vs weapon per target in Land Warfare?*

Office of Force Transformation

Transforming Defense

Office of Force Transformation

“Networked Forces Outfight Non-Networked Forces”

“...it allowed us to make decisions and execute those decisions faster than any opponent.”

*Lt. Gen. David D. McKiernan
Combined Forces Land Component
Commander, OIF*

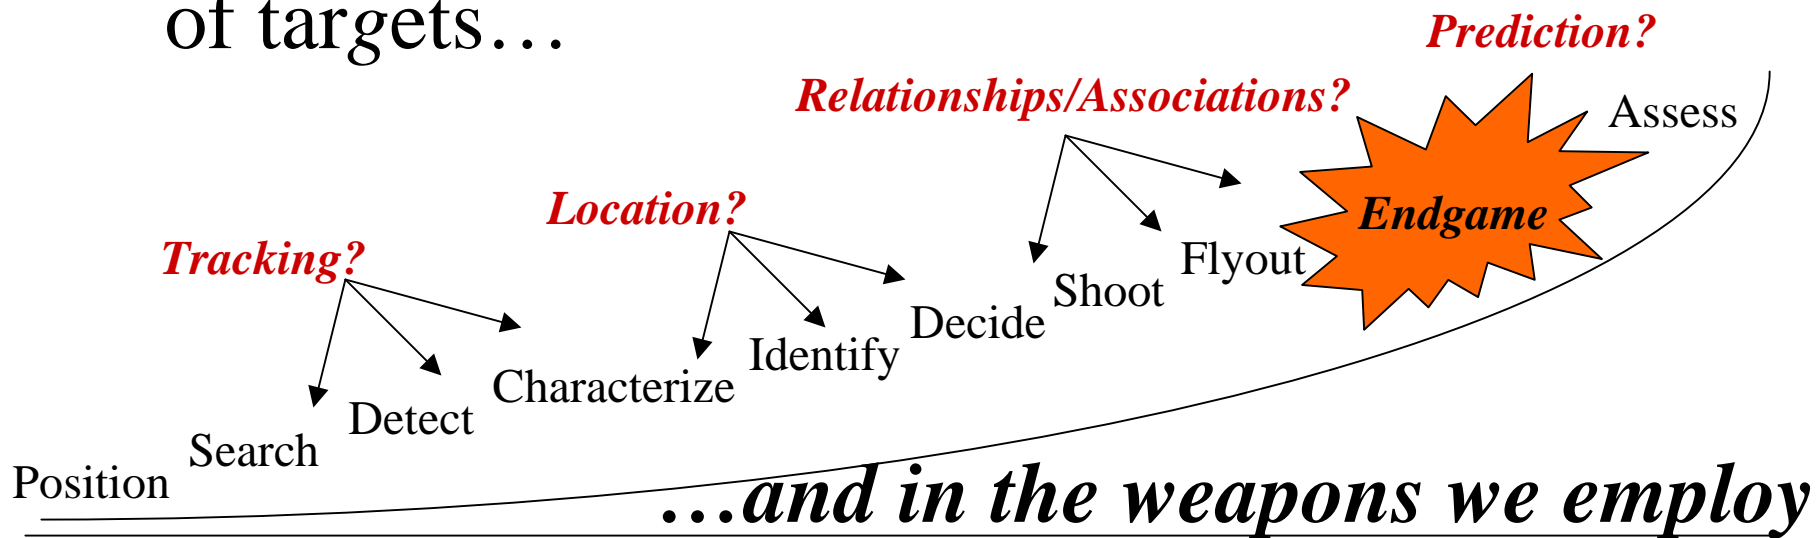

Next Generation Weapons

...Do We Have the Right Weapons For the Right War?

Office of Force Transformation

- There is a need for more discrimination, flexibility and response in the determination of targets...

The Engagement Timeline

...is not just about time

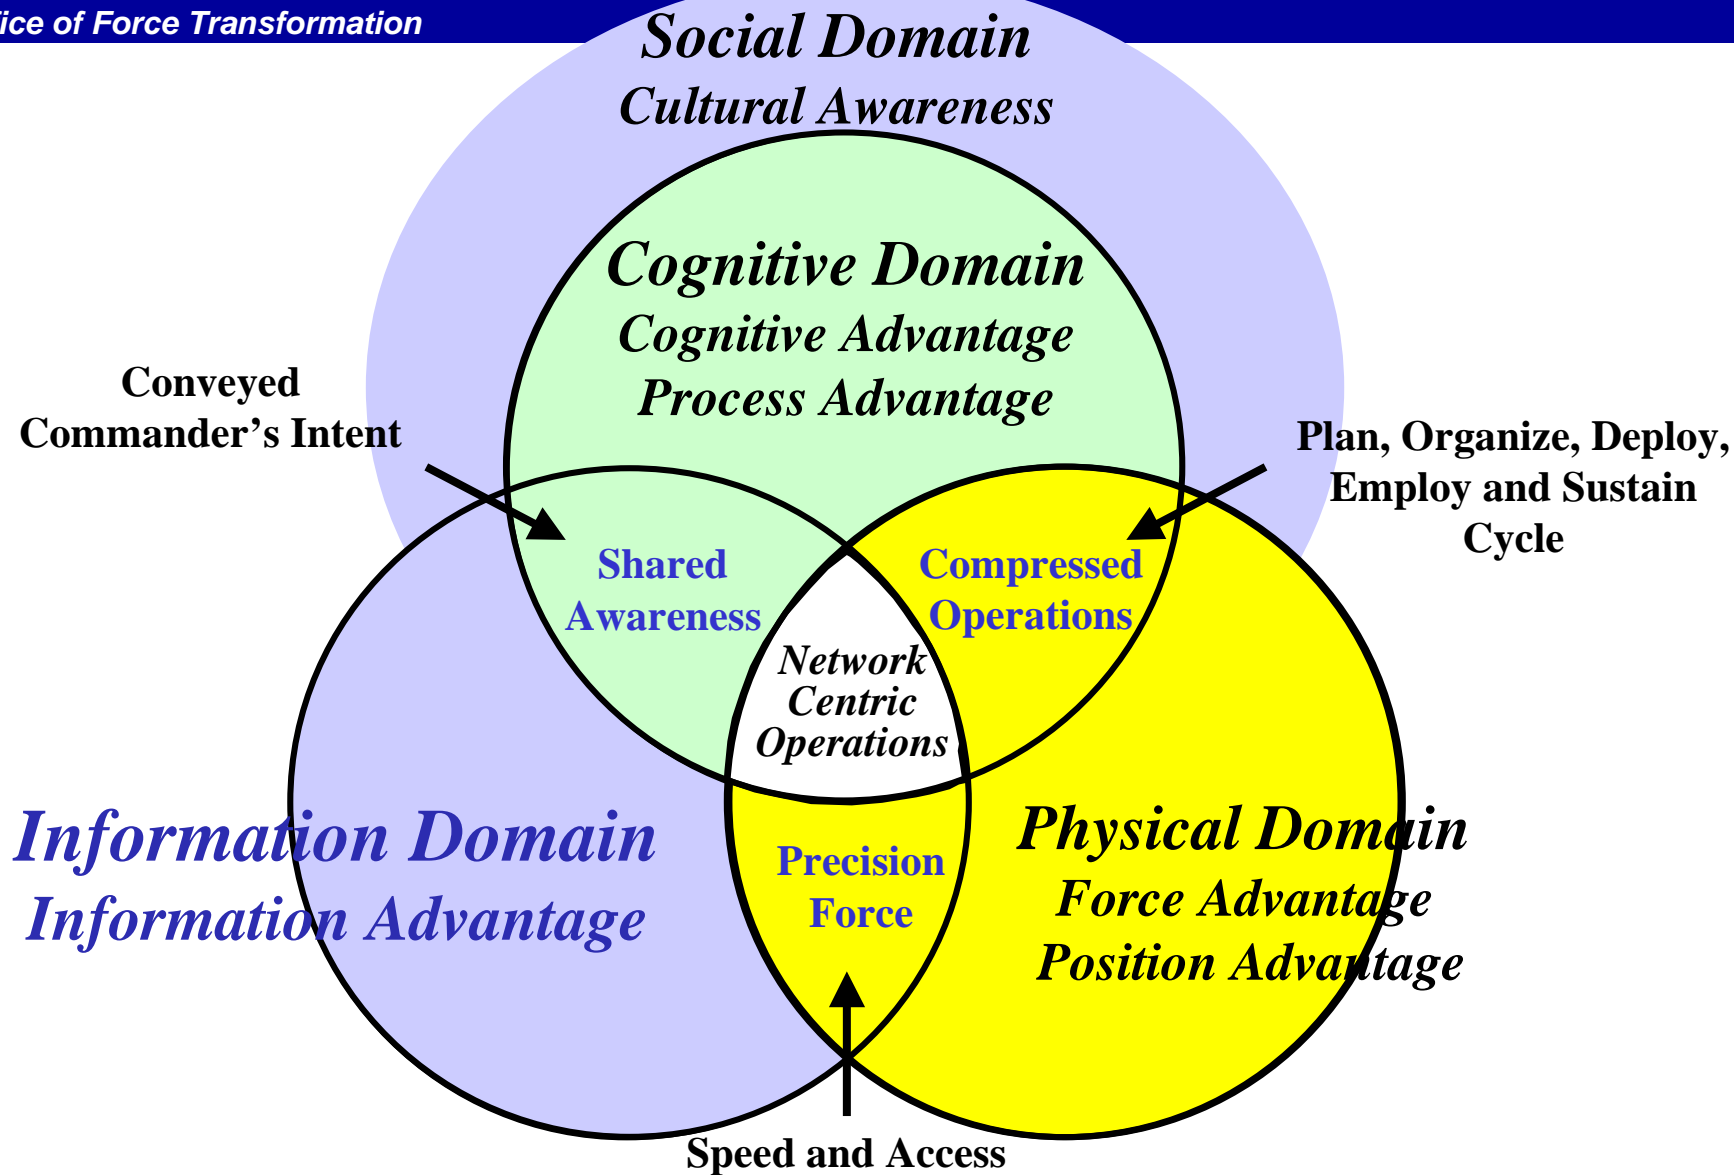

Competing in the Information-Age

...the power of Network-Centric Operations

Office of Force Transformation

Tenets of Network-Centric Operations

...The new value chain

Office of Force Transformation

- A robustly networked force improves information sharing
- Information sharing and collaboration enhances the quality of information and shared situational awareness
- Shared situational awareness enables collaboration and self synchronization, and enhances sustainability and speed of command
- These in turn dramatically increase mission effectiveness

Strategic Approach to Cost

Office of Force Transformation

The Need:

Since this is the age of the small, fast, and many, we need organizations, processes, and a strategic approach to cost, capable of delivering the requisite capabilities.

An Approach:

- Strategies for divestiture and devolution of capabilities
- Suppressing the monetary cost of war
- Cost imposing strategies
- Mitigation of cost imposing strategies
- Reversing the current trend of paying more for decreasing returns

New metrics create opportunities for new cost dynamics!

Transforming the Metrics

...Shifting value to outcomes

Office of Force Transformation

Initial Metrics

- Networking
- Speed
- Numbers
- Content Generators
- Dispersal

Value of Time
vs.
Cost of Speed

New Basis for Competition

- Create and preserve options
- Employ higher transaction rates
- Achieve higher learning rates
- Create overmatching complexity

“Dissuasion” = f (present value of future capabilities, future value of present capabilities)

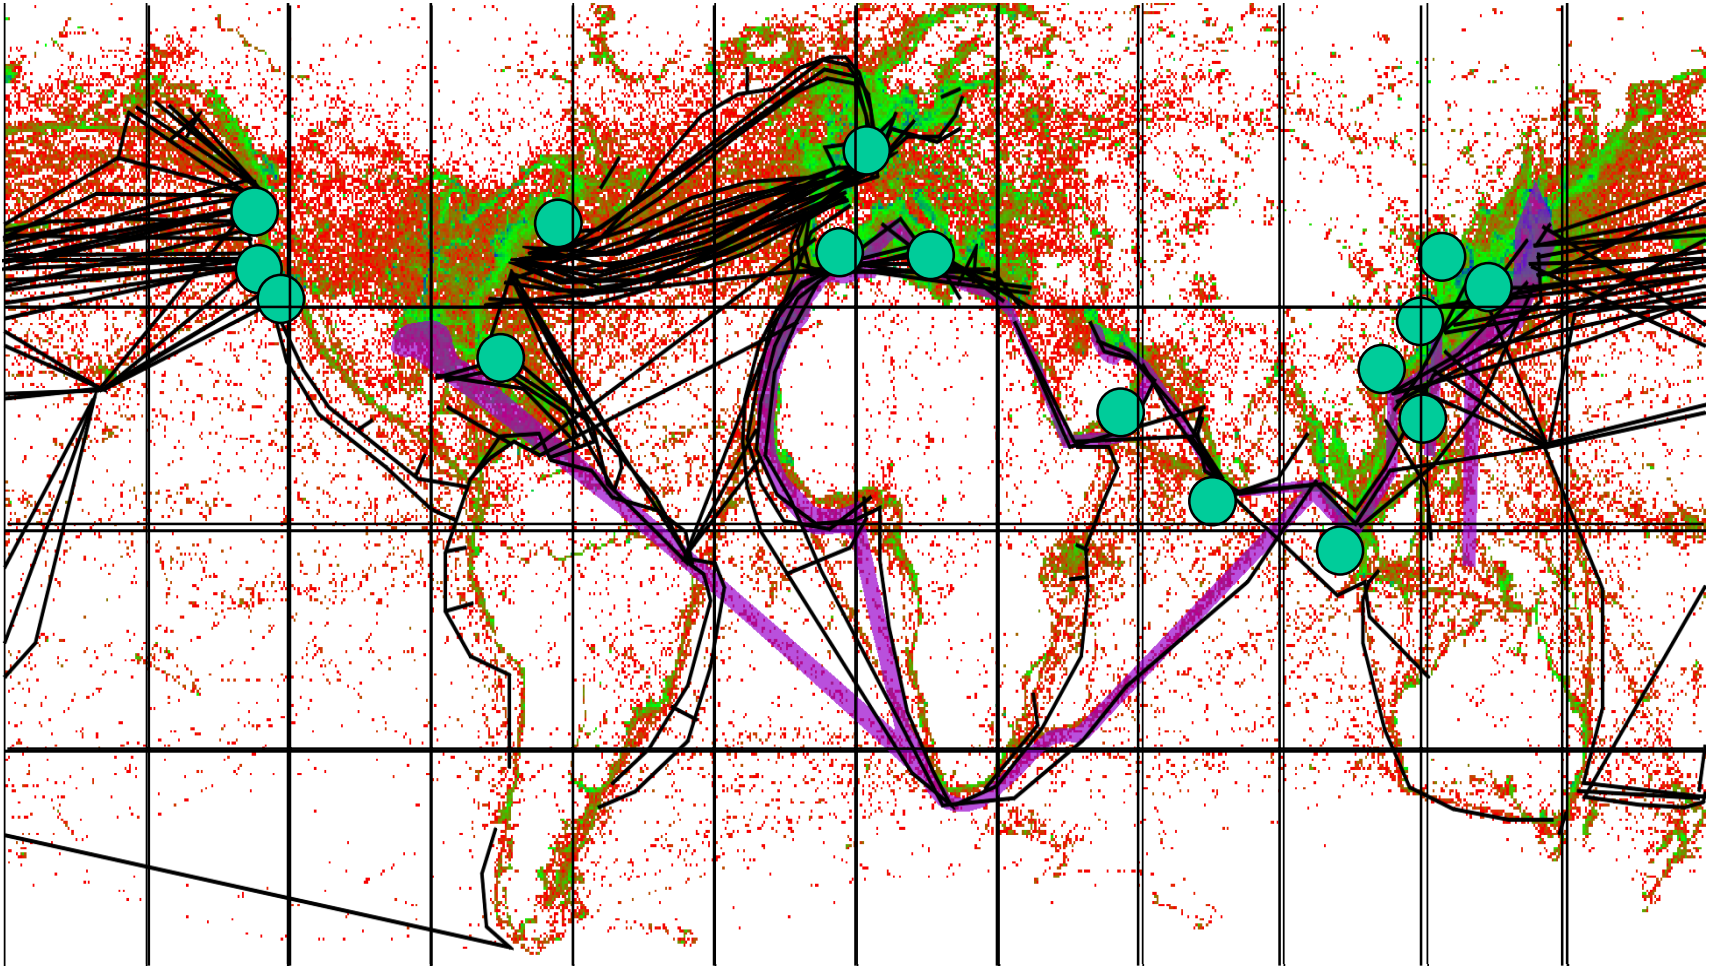

Global Trends

Globalization III

Industrial Age

Information Age

Fundamental Question

Office of Force Transformation

What do we mean by
Innovation in Defense?

Security Environment

... *Four Challenges*

Military Innovation: Historical Insight

Office of Force Transformation

The history of innovation in carrier aviation says something of great importance about military innovation generally: it is not a process that usually proceeds in a linear way. But hindsight tends to make us think that it does. Because we try to compose coherent histories of innovation, we may actually overlook the uncertainty and chance that inevitably exist.

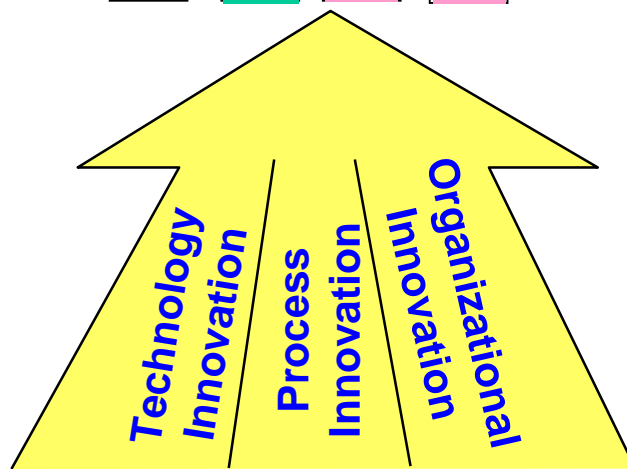

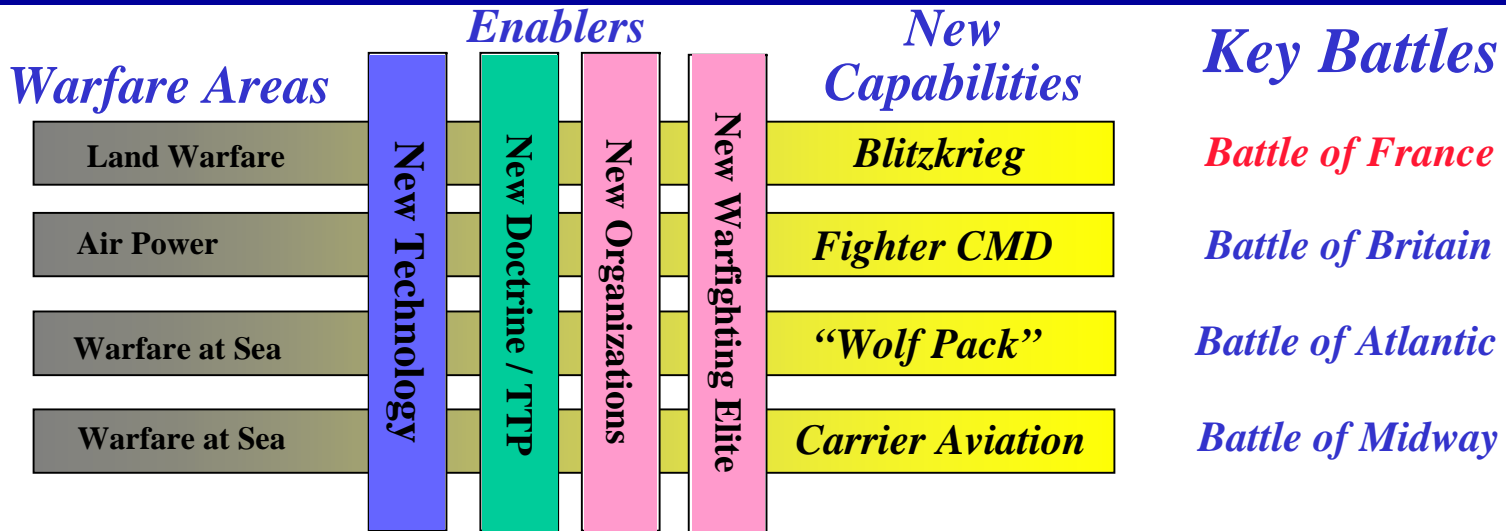

American & British Aircraft Carrier Development: 1914-1941

Creating Competitive Advantage: Warfighting Innovation

Office of Force Transformation

Warfighting Innovation → Competitive Advantage

Creating Competitive Advantage

...Historical Insights

Office of Force Transformation

- Land Warfare: Sustained Rate of Fire
 - Rifle (1.8×10^1 rounds per minute)
 - Machine Gun (6×10^2 rounds per minute)
- Air Warfare
 - Precision Weapons + Precision Targeting
 - Sorties per Target \longrightarrow Targets per Sortie
- Warfare at Sea: Range of Engagement
 - Battleship: 1.8×10^1
 - Carrier Aviation: 1.8×10^2

Commander in Chief's Perspective

Office of Force Transformation

“Building tomorrow's force is not going to be easy. Changing the direction of our military is like changing the course of a mighty ship -- all the more reason for more research and development, and all the more reason to get started right away.

Yet, building a 21st century military will require more than new weapons. It will also **require a renewed spirit of innovation in our officer corps. We cannot transform our military using old weapons and old plans. Nor can we do it with an old bureaucratic mind set that frustrates the creativity and entrepreneurship that a 21st century military will need.”**

***President George W. Bush
Graduation Address
U.S. Naval Academy, May 25, 2001***

CNO's Perspective

Office of Force Transformation

“The key now is to accelerate this progress through a culture of innovation. ...*Aggressive innovation, experimentation, and education are fundamental to meeting the challenges of an uncertain future.*”

- CNO Admiral Vern Clark

Remarks at Current Strategy Forum 2002
Naval War College, Newport, RI

Transformation

...Elements

Office of Force Transformation

- ✓ Continuing process
- ✓ Creating/anticipating the future
- ✓ Co-evolution of concepts, processes, organizations and technology
- ✓ New competitive areas / competencies; revalued attributes
- ✓ Fundamental shifts in underlying principles
- ✓ New sources of power
- ✓ Broadened capabilities base

- *New technology context*
- *Broadened threat context*
- *New strategic context*

A Broad and Sustained Competitive Advantage

Meeting the Challenges of the New Competitive Landscape
